One Pair of Eyes® Guidelines for
Safety Goggle Design and Ad Assignment

Students will design safety goggles to prevent injuries from chemical spills/splashes, heat injuries, impact injuries, and light injuries. Students will also create an advertisement (15 and 30 second) for their goggles.

1. Students can design the following safety eye wear either drawn by hand or with computer graphics program:
   a. Splash (cover) goggles: Chemical spill/splash
   b. Face shields: Chemical spill/splash
   c. Safety spectacles/goggles: Heat, Impact and Light
   d. Sports glasses: Impact
   e. Welder’s Mask: Light

2. The following information must be included in the design:
   a. Dimensions of safety wear
   b. Types of materials used and why
   c. Purpose of the design
   d. Safety features and reasons for them

3. Advertisements for safety wear may be done either only audio or both audio and visual. 2 advertisements should be made; one 15 seconds in length and one 30 seconds in length.
   a. May be created in a digital movie (YouTube style) but may be performed live if there is no way to create digital format.
   b. Students perform/execute the PSA they created for the entire group.
   c. Students turn in a written (if performed live) or electronic version (if on video) of the design and advertisement.
   d. Teachers may forward exceptional designs and advertisements to Prevent Blindness Ohio/Nationwide Children’s Hospital Community Education for potential use in future teen Eye Health and Safety programs: OnePairofEyes@NationwideChildrens.org.
   e. Call Nationwide Children’s Hospital Community Education (614) 355-0679 for more info.
